Julien Jin

Software Engineer — julienjin.dev

Backend-focused engineer at 42 Paris. I like knowing how things work underneath (memory, networking, concurrency) and building systems that hold up under pressure. Years of teaching and interpreting taught me to explain them as clearly as I build them.

PROJECTS 01

ft_transcendence – *Virtual 3D Coworking Space*

</> Go, PostgreSQL, WebSockets

- Collaborated in a team to build an interactive 3D virtual environment, architecting a high-performance Go backend with a real-time WebSocket broadcasting engine.
- Engineered secure auth flows integrating OAuth, 2FA (TOTP), and JWT sessions, backed by atomic PostgreSQL CTEs to eliminate race conditions.

webserv – *Custom HTTP/1.1 Server*

</> C++98, Sockets, Epoll

- Engineered a fully functional, non-blocking HTTP/1.1 server from scratch in C++98, capable of handling concurrent connections and dynamic CGI script execution.

Inception – *Dockerized System Infrastructure*

</> Docker Compose, Nginx, MariaDB

- Designed and deployed a secure, multi-container architecture from scratch using Alpine Linux, complete with custom virtual volumes and internal networking.

EDUCATION 02

IT Architecture Expert (RNCP Level 7, Master's level)
42 Paris – Paris, France 2025 – Present

Undergraduate Studies in Physics & Medical Pathway
Paris-Cité University – Paris, France 2021 – 2024

EXPERIENCE 03

English Instructor
AVES English (Japanese Online School) – Remote 2024 – Present

- Taught personalized English lessons focused on grammar, vocabulary, and practical communication.
- Developed personalized long-term learning strategies to improve students' independent learning and information retention.

Guest Relations Volunteer
Cloud Native Days France – Paris, France Feb 2026

- Linked attendees and event operations at a DevOps and cloud conference, solving on-site issues.

Multilingual Interpreter (FR, EN, JP)
Paris Fashion Week – Paris, France Oct 2024 & Mar 2025

- Performed real-time interpretation on-site, facilitating smooth communication between international stakeholders under strict time constraints.

SKILLS 04

Backend & Architecture

- **Languages:** C, C++, Go
- **Networking:** HTTP, Sockets, WebSockets, REST, OAuth, JWT
- **Core Concepts:** Concurrency, Memory Management, Database Architecture
- **Data:** PostgreSQL, MariaDB

DevOps & Infrastructure

- **Containers:** Docker, Compose
- **OS & Servers:** Linux, Nginx, Bash
- **Workflow:** Git, Make, LaTeX

Frontend & Design

- **Core:** HTML, CSS, Vanilla JS
- **Design:** Figma, Photoshop

LANGUAGES 05

Native & Bilingual

- French, English

Professional Working

- Chinese, Japanese

Basic Working

- Spanish, Korean
